**PRINTING: Print at 100% / Actual Size (Do NOT select 'Fit to Page'). Physical Marker Size = 10.0 cm.**

0cm 1cm 2cm 3cm 4cm 5cm 6cm 7cm 8cm 9cm 10cm

100 mm Calibration Standard (Verify with ruler)

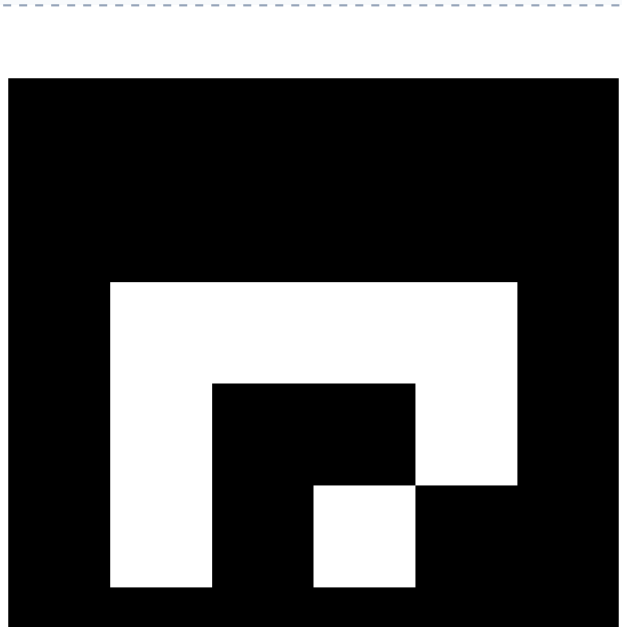

**TAG ID #0**

## HOME BASE / ORIGIN DOCK

Primary vehicle start point & charging dock.
Used for return-to-base and origin alignment.
Vehicle stops when distance <= 28 cm.
Dictionary: DICT_4X4_50 | Marker: 10.0 cm

✂ **CUT ALONG DASHED BOUNDARY**

Mount vertically at car camera height (~12-15 cm from ground)

0cm 1cm 2cm 3cm 4cm 5cm 6cm 7cm 8cm 9cm 10cm

100 mm Calibration Standard (Verify with ruler)

**TAG ID #1**

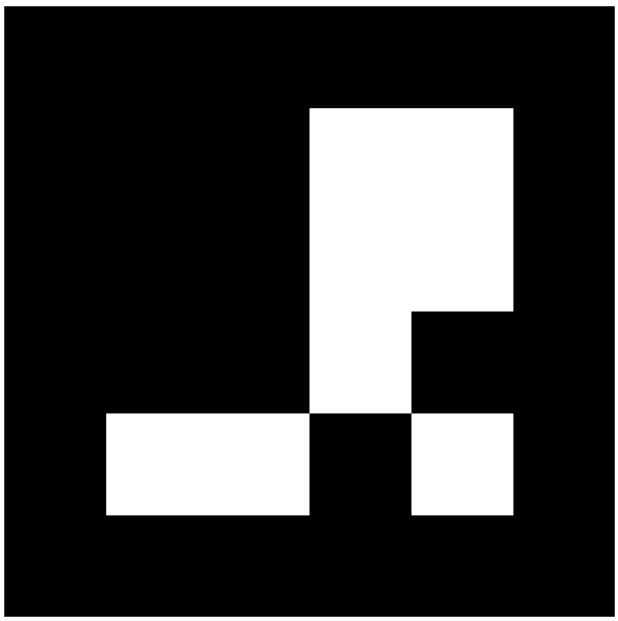

## WAYPOINT ALPHA (MIDPOINT)

Corridor midpoint & navigation check-in.
Provides bearing correction on long straights.
Autonomously sequenced in linked route mode.
Dictionary: DICT_4X4_50 | Marker: 10.0 cm

✂ **CUT ALONG DASHED BOUNDARY**

Mount vertically at car camera height (~12-15 cm from ground)

**PRINTING: Print at 100% / Actual Size (Do NOT select 'Fit to Page'). Physical Marker Size = 10.0 cm.**

0cm 1cm 2cm 3cm 4cm 5cm 6cm 7cm 8cm 9cm 10cm

100 mm Calibration Standard (Verify with ruler)

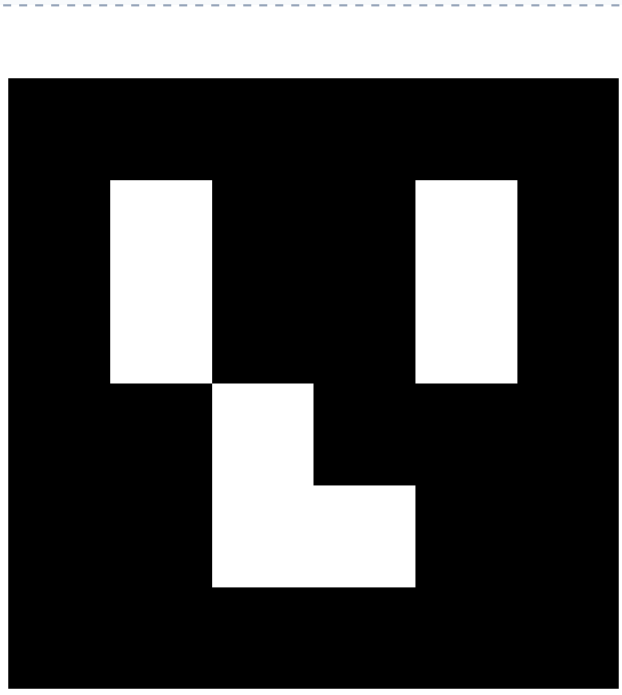

**TAG ID #2**

## WAYPOINT BETA (DETOUR PIVOT)

Turn pivot & obstacle detour re-alignment tag.
Placed before junctions, doorways, or turns.
Vehicle navigates smoothly into target heading.
Dictionary: DICT_4X4_50 | Marker: 10.0 cm

✂ **CUT ALONG DASHED BOUNDARY**

Mount vertically at car camera height (~12-15 cm from ground)

0cm 1cm 2cm 3cm 4cm 5cm 6cm 7cm 8cm 9cm 10cm

100 mm Calibration Standard (Verify with ruler)

**TAG ID #3**

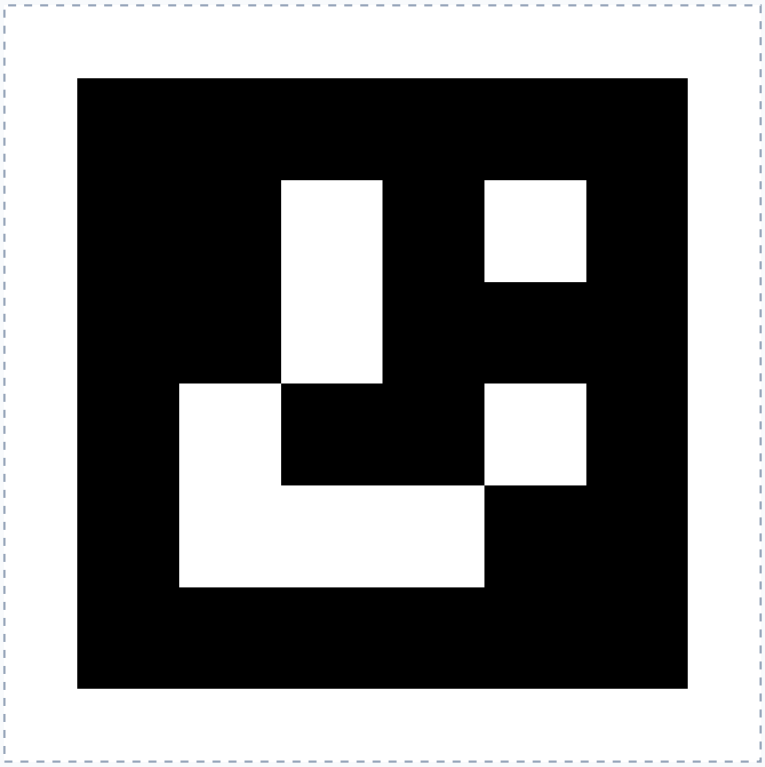

## TERMINAL (DESTINATION GOAL)

Final mission destination goal landmark.
Vehicle homes in with millimeter 3D precision.
Triggers ARRIVED_AT_DESTINATION state & halt.
Dictionary: DICT_4X4_50 | Marker: 10.0 cm

✂ **CUT ALONG DASHED BOUNDARY**

Mount vertically at car camera height (~12-15 cm from ground)

**PRINTING: Print at 100% / Actual Size (Do NOT select 'Fit to Page'). Physical Marker Size = 10.0 cm.**

0cm 1cm 2cm 3cm 4cm 5cm 6cm 7cm 8cm 9cm 10cm

100 mm Calibration Standard (Verify with ruler)

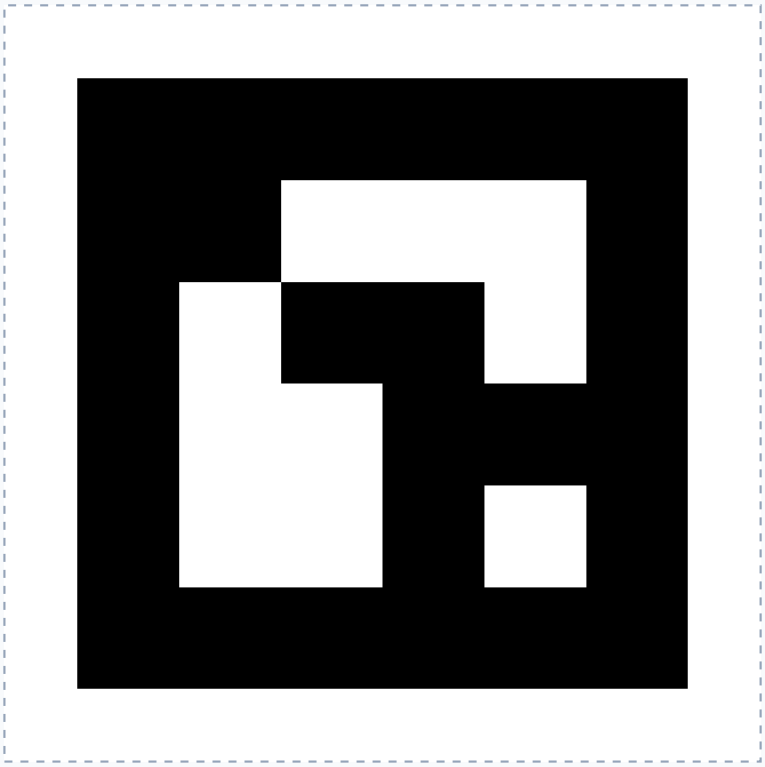

**TAG ID #4**

## OBSTACLE BYPASS TARGET

Alternate bypass beacon around physical blocks.
Used by ONNX and radar detour planners.
Dictionary: DICT_4X4_50 | Marker: 10.0 cm

✂ **CUT ALONG DASHED BOUNDARY**

Mount vertically at car camera height (~12-15 cm from ground)

0cm 1cm 2cm 3cm 4cm 5cm 6cm 7cm 8cm 9cm 10cm

100 mm Calibration Standard (Verify with ruler)

**TAG ID #5**

## AUXILIARY / SECONDARY DOCK

Secondary docking station or waypoint link.
Dictionary: DICT_4X4_50 | Marker: 10.0 cm

✂ **CUT ALONG DASHED BOUNDARY**

Mount vertically at car camera height (~12-15 cm from ground)

PRINTING: Print at 100% / Actual Size (Do NOT select 'Fit to Page'). Physical Marker Size = 10.0 cm.

**Quick 4-in-1 Sheet: Scaled to 7.0 cm for desktop test tracks or small cardboard setups.**

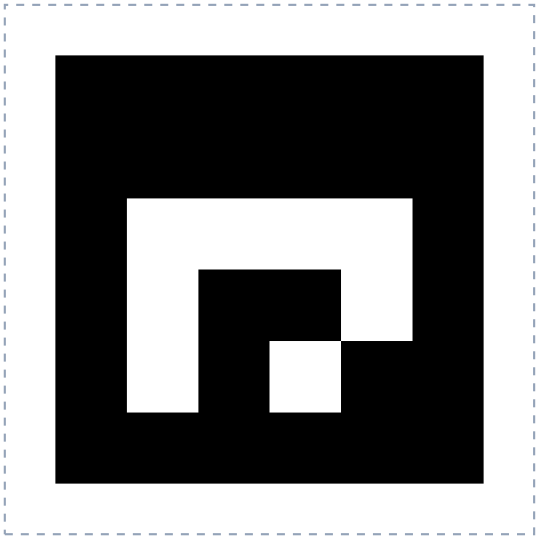

**TAG #0 (Home Base)**

70 mm Calibration Standard (Verify with ruler)

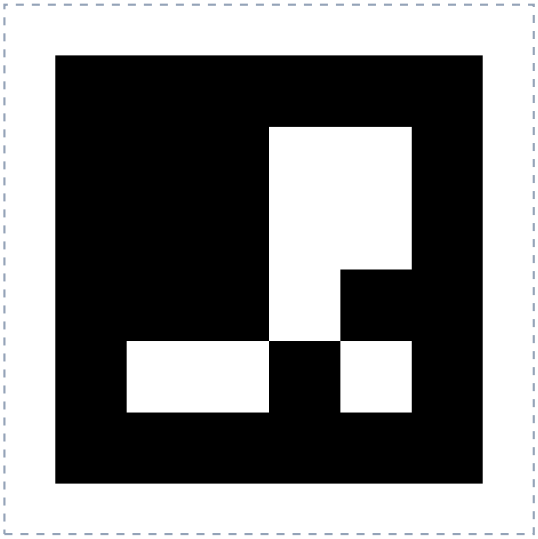

**TAG #1 (Waypoint Alpha)**

70 mm Calibration Standard (Verify with ruler)

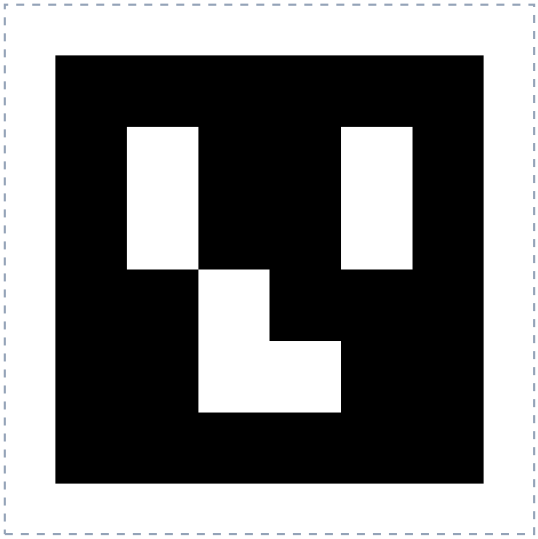

**TAG #2 (Waypoint Beta)**

70 mm Calibration Standard (Verify with ruler)

**TAG #3 (Destination)**

70 mm Calibration Standard (Verify with ruler)
